Why Currency Matters

Your invoice is issued in **USD** and must be paid in **USD**. If your payment is converted to GBP (or any other currency) before reaching our account, you will incur foreign exchange charges, intermediary bank fees, and potential payment shortfalls. Our bank, Revolut Ltd, receives payments in whatever currency is sent they cannot control incoming transfers.

How to Pay Your USD Invoice Correctly

Follow these steps to ensure your payment reaches us in **USD**:

1. **Check the currency field**, payment instruction shows **USD** (not GBP or any other currency)
2. **Confirm with your bank** that payment will be sent in USD without automatic conversion
3. **Use the complete bank details below** including the intermediary BIC code (If required)
4. **Verify your payment confirmation** before authorising it must clearly state **USD**
5. **Email your remittance advice** to accounts@sarrlogistics.co.uk when payment is made
